## OBJECTIVE

A highly motivated and adaptable individual, eager to contribute to impactful projects while embracing opportunities for growth and learning. Dedicated to making a positive contribution in a dynamic environment, with a strong commitment to excellence and collaboration.

## SKILLS AND CERTIFICATIONS

Web Technologies	HTML5, CSS, ReactJS, Angular, Node.js, Express.js, PHP
Programming Languages	Python, JavaScript, Java, C++, C
Database Management	MySQL, MongoDB, Database Design
Cloud Platforms	AWS (EC2, S3, Lambda, RDS)
Version Control	Git, GitHub
DevOps	Docker, Jenkins, Kubernetes, CI/CD
Methodologies	SDLC, Agile
Certifications	AWS Cloud Practitioner, Full-Stack Development with React and Angular

## CERTIFICATIONS

**AWS Cloud Practitioner:** Demonstrated foundational knowledge of AWS cloud concepts, services (EC2, S3), security, architecture, and support.

**Full Stack Web Development with React and Angular:** Gained expertise in creating responsive web applications using React, Angular, Node.js, and Express.js, managing state, and integrating APIs.

## PROJECTS

**Responsive Web Application for E-commerce (Ishop):** Developed a dynamic, responsive e-commerce website using HTML, CSS, Bootstrap, PHP, and MySQL. Enhanced the user interface with interactive elements, ensuring cross-browser compatibility and improved site performance. Collaborated closely with designers to translate wireframes into functional web pages.

**Automated University Time Table Generator:** Built an interactive web application using JavaScript and ReactJS for generating automated university timetables. Designed a responsive UI, integrated APIs for data retrieval, and worked within an Agile environment.

**Android Application for Assisting Farmers in Regional Languages:** This project involved the development of a powerful Android application designed to detect and accurately identify common crop diseases using a deep convolutional neural network. The app provides farmers with timely and precise information, helping them safeguard their crops and improve yield. By supporting regional languages, it ensures accessibility and ease of use for farmers in diverse communities.

## ACHIEVEMENTS

**First Prize in 8-Hour Web Development Hackathon:** Won first place in a competitive web development hackathon at the Institute of Aeronautical Engineering. Demonstrated strong problem-solving skills, creativity, and the ability to deliver high-quality, functional web applications under time constraints.

**Third Prize in 24-Hour Lexicon 4.0 Hackathon:** Secured second place in a 24-hour hackathon organized by the Career Development Center at IARE. Worked collaboratively in a team to design and develop a software solution, showcasing proficiency in coding, debugging, and adapting quickly to new challenges.

## EDUCATION

Master of Science in Computer Science, University of North Texas	2023 - Present
Bachelor of Technology in CSE, Institute of Aeronautical Engineering	2019 - 2023

## DECLARATION

To the best of my knowledge and belief, I hereby certify that all of the information is true and authentic.
